EDUCATION

Bachelors of Computer Science , <i>University of Education</i> Key Courses: Object-Oriented Programming, Data Structures & Algorithms, Operating Systems, Theory of Automata, Artificial Intelligence	11/2022 – 08/2026
Intermediate in Computer Science , <i>Punjab Group of Colleges</i>	08/2019 – 05/2021

SKILLS

Frontend Development React.js (Functional Components, Hooks) JavaScript (ES6+) HTML5 CSS3	UI / UX & Design Figma (UI Design, Wireframing)
Tools & Version Control Git GitHub Visual Studio Code	API Integration REST APIs (fetch / axios)

PROJECTS

Library Management System Electron.js Developer (In Progress) , <i>LMS</i> • Building a cross-platform desktop application to manage books, members, and borrowing workflows . • Automating routine library operations (issuance, returns, record tracking), reducing manual effort and minimizing errors . • Improving workflow efficiency by ~60% through streamlined processes and reduced data entry time . • Implementing a smart issuance system with due-date tracking and automated fine calculation . • Developing fast search & filtering using book metadata (title, author, category). • Designing role-based access control for secure admin and staff operations . • Optimizing offline performance using local database solutions (SQLite / IndexedDB).	01/2026 – Present
iPhone 3D Interactive Showcase , (<i>React, Three.js, GSAP</i>) • Developed an interactive 3D iPhone showcase using React, Three.js (R3F) , and GSAP , featuring advanced animations and camera controls for an immersive user experience. • Built a camera “ explode ” module with GSAP ScrollTrigger to separate 3D components and display technical annotations . • Implemented cinematic camera transitions to highlight features like the Action Button . • Created smooth material transitions using GSAP interpolation for realistic Titanium finishes . • Optimized rendering performance and deployed the application on Vercel , improving load efficiency and user experience .	02/2026 – 03/2026
