PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience building **Large Language Model (LLM) applications, Retrieval-Augmented Generation (RAG), Agentic AI and real-time Voice AI** systems in Python. Built an end-to-end voice interview pipeline (Speech-to-Text, LLM, Text-to-Speech, barge-in, data persistence) with **LiveKit Agents, Whisper and ElevenLabs**, backed by **FastAPI and PostgreSQL**. Experienced with LangChain, LangGraph, CrewAI and Model Context Protocol (MCP), plus full-stack development in React, Next.js and Node.js.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), TypeScript, SQL

Generative AI & LLMs: LLMs, Prompt Engineering, Retrieval-Augmented Generation (RAG), Transformers, Hugging Face, GPT, BERT, T5

Agentic AI: AI Agents, Multi-Agent Systems, LangChain, LangGraph, CrewAI, Agent Memory, Guardrails, MCP

Voice & Real-Time AI: LiveKit Agents, Speech-to-Text (Whisper), Text-to-Speech (ElevenLabs, Meta MMS-TTS), VAD, Real-Time Audio

Machine Learning: Machine Learning, Deep Learning, NLP, Computer Vision, TensorFlow, PyTorch, K-Means, PCA, Feature Engineering, EDA

Backend & Databases: FastAPI, Flask, Node.js, Express.js, REST APIs, JWT, PostgreSQL, Alembic, MySQL, SQLite

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Data & Tools: Pandas, NumPy, Matplotlib, Git, GitHub, VS Code, Cursor, Figma

EDUCATION

Bachelor of Science in Computer Science, University of Education | Nov 2022 – Aug 2026

Intermediate in Computer Science, Punjab Group of Colleges | Aug 2019 – May 2021

PROFESSIONAL EXPERIENCE

Python & AI/ML Developer Trainee

PureLogics | Lahore, Pakistan | Jun 2026 – Sep 2026

- Completed hands-on training in **Python, Data Science, ML, Deep Learning, NLP and Generative AI**; applied preprocessing, EDA and feature engineering to real-world datasets and built ML pipelines with **K-Means, PCA, TensorFlow, PyTorch, DNNs and CNNs**.
- Worked with **Transformers, GPT, BERT, T5 and Hugging Face**; developed LLM applications using **prompt engineering and RAG**.
- Built AI agent workflows with **LangChain, LangGraph and CrewAI** (memory, multi-agent, guardrails) and **MCP**; developed AI-powered REST APIs with **FastAPI and Flask**.

PROJECTS

Adaptive Multimodal AI Interview & Candidate Assessment System

PureLogics Final Project, Team of 3 | Python, FastAPI, LiveKit Agents, Whisper, ElevenLabs, PostgreSQL, Alembic, LLMs

- Owned the **Voice Interview and Recruiter Dashboard** track of an AI recruitment platform combining JD/CV matching, adaptive interviewing and voice-based assessment.
- Built a real-time **voice interview agent on LiveKit Agents** with custom STT, LLM and TTS nodes, a proactive greeting, **VAD-based barge-in**, silence detection, noise suppression and voice-triggered interview end.
- Integrated **self-hosted Whisper (CPU)** for Speech-to-Text and **ElevenLabs** Text-to-Speech with an automatic local **Meta MMS-TTS fallback** through a provider-factory design, keeping it usable without a GPU or paid quota.
- Tested Urdu/Roman Urdu against English speech recognition and, with supervisor approval, moved the STT, LLM and TTS pipeline to English for reliability.
- Replaced a mock bridge with the team's **Interview Intelligence and assessment services**; linked voice sessions to applications and stored **idempotent, eligibility-gated interview results** in PostgreSQL (Alembic migrations).
- Implemented integrity controls (**fullscreen monitoring, tab-switch detection, auto-termination, transcript protection**); developing the recruiter dashboard for scores, strengths and gaps.

Library Management System

University Final Year Project (FYP) | Electron.js, React, Node.js, Express.js, MySQL, Sequelize | Jan 2026 – Aug 2026

- Built a cross-platform desktop app for books, members, borrowing, returns and fines, with dashboard analytics.
- Designed a maintainable backend using the **Service-Repository pattern** with **JWT authentication and Role-Based Access Control (RBAC)**.

BrainWave AI SaaS Platform

Next.js, React, Tailwind CSS, Zustand, Framer Motion | Apr 2026 – May 2026

- Developed a responsive AI SaaS landing page and dashboard with an interactive **AI Prompt Lab** and animated UI.
